

1 Distance between conditions

Client side, Jensen–Shannon divergence (JSD)

Counselor side

both distances exceed real counseling's noise band; the conditions separate on the client side

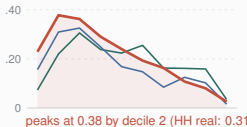

2 Client categories over time

Share of client spans, by decile of conversation progress

HH real HH roleplay H-LLM roleplay

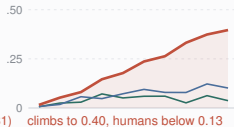

Discloses too early

Problem statement + definition

Drifts into solutions

recommendations, resources

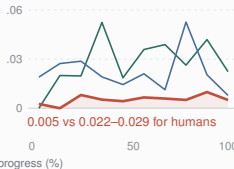

Rarely asks back

General request

Never disagrees

Rejection

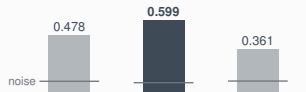

conversation progress (%)

3 Course-level convergence

One course line, three semesters—client deployment exchanged

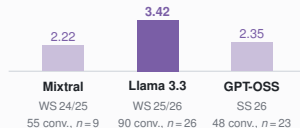

Measured distance

Client JSD to HH real

Perceived as *less* human

realism item (1–5)

Only humanlikeness moves. The five general acceptance constructs—usefulness, ease of use, enjoyment, intention, social influence—do not shift between semesters (all $p \geq .17$, $|\delta| \leq 0.23$).
